

In [3]:

```
##OVERSCAN AND TRIM##  
'''  
Step 2: collect the raw data sorted and stored in fuel_init.util._(data type).raw_files  
  
- data are bias corrected and the overscan regions trimmed.  
- individual chip images are stitched together, and cosmic rays cleaned.  
- saved as new fits files with updated headers  
  
Results from this step stored in fuel_init.util.intermediate_dir, and the letter `b` appended to the file name.  
'''  
fuel_ost = overscan_and_trim(fuel_init)
